

# BIG GREEN THING

## MAKE A SPACE ROCKET

MAKE A SPACE ROCKET FROM CARDBOARD TUBES  
- PLEASE CHECK WITH A GROWN-UP BEFORE  
STARTING TO MAKE THIS!

### YOU WILL NEED ►

1. 4 toilet roll tubes
2. 1 paper towel tube (or a wrapping paper tube for a really big rocket!)
3. Glue
4. Aluminium foil
5. Construction paper / sugar paper

- Glue the toilet roll tubes to the sides of the paper towel tube at the bottom (the short tubes are your booster rockets).
- Make a cone from the construction paper and glue it onto the top of the rocket.
- When the glue has dried, cover the whole rocket in aluminium foil and decorate with paint and cutout construction paper.
